Major Wright of Coalville was in town last week.

Many compliments are made to the non-partisan stand of THE TIMES, and which is true to its pledge. This is not said of the Deseret News which is making high bids, unworthy of an independent (?) paper, for its political preferences. This course will not help it a little bit.

The Democrats will hold a rally in Marchant's hall today, Thursday. The speakers will be the Hon. Ward E. Pack, Sr., Charles E. Street and E. W. Berry.

Here, says our exchange, is something that is worth \$1 to every farmer, in the land to know: sprinkle a little stone lime in your stock tank and not a particle of green scum will form in the water. When the lime loses its strength and begins to form, which may be during the winter, wash out the tank and repeat the dose. It is cheap, not only nutritious, but wholesome, keeps the water sweet and clean.

WEEKLY REVIEW.

The Business of the Week as Reported by Our Review.

Entomological interests in many of the states cause a natural thickening in some kinds of business. But on the whole business indications are rather more favorable than they were a week ago. Gold exports have increased, quite a number of mills have gone into operation, and the demand for products is not equal to that of previous years, but is better than it has been since the time of the Civil War.

The price of live cattle did not improve much, and there are still some strikes to recruit reductions of wages, so that the purchasing power of the people cannot have materially increased, but there is a more buoyant spirit which prevails generally.

On the other hand the cost of pastures has gone down somewhat.

Estimated by W. H. Fletcher, Lead At-

lance, Washington, D. C.

It is still, as it has been for some months, a very encouraging fact that the volume of commercial failures is small.

Reports for the three weeks of October cover liabilities of only \$3,000,700, of which \$2,600,821 were in manufacturing and \$2,367,567 of trading concerns. The failures for the week were 25 in the United States against 42 last year, and 22 in Canada against 42 last

year.
